

Go Green _ Ceramics and the Environment

Domitilla Biondi | Italy

Future Lights of Ceramics International | *Kilkenny, 7th September 2018*

Full text at www.domitillabiondi.com/art | presentation of 5 minutes

Hello. I AM Domitilla Biondi, Creator.

In 1996 I graduated in Graphic Design in Milan and I worked for 20 years as a self employed professional in Visual Communication. I immediately pioneered Digital Design (awarded, exhibited and featured) & taught web design for 5 years because I love to relate with people and share my spirit of innovation, as I usually have a self-thought approach to investigation of Creativity.

In 2013, becoming an holistic therapist, I expressed an innovative peculiar carving technique - **Paper Poetry** that consists in sculpting in a meditative state, with only a scalpel and moved by inspiration.

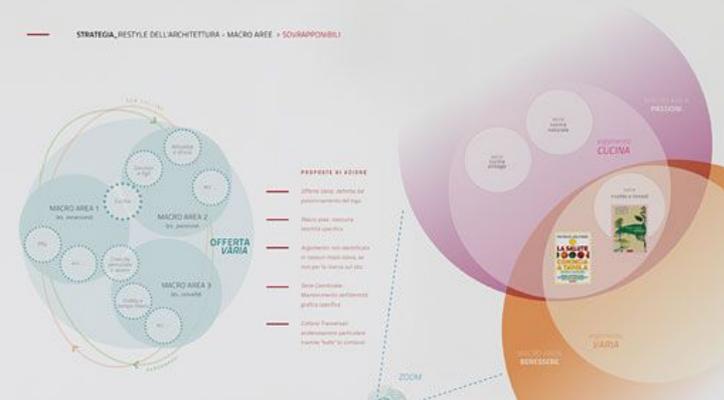

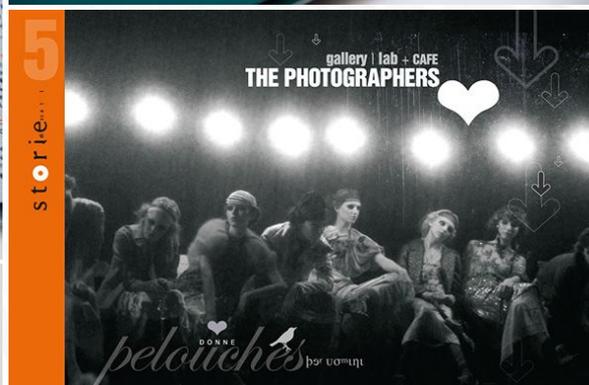

In 2015 I begun practicing the discipline of *Conscious Living*, and from 2018 also promoting it. (more info on www.domitillabiondi.com).

In June 2016 I committed full time to my career as an Artist and began to exhibit.

In January 2018, I decided to approach porcelain, so I AM formally **an early career ceramist**.

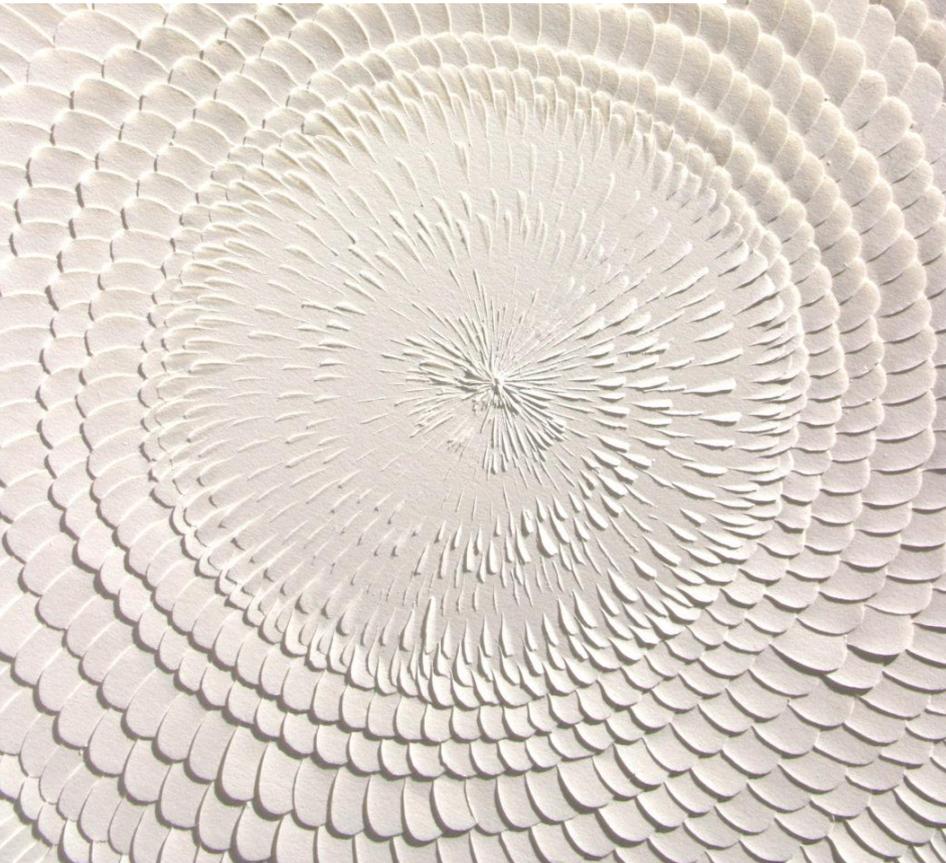

My previous job...

...my Artistic research, now.

What does GO GREEN mean for me?

Everything vibrates, between frequencies called infraRED (grave) to ultraVIOLET (acute). GREEN is in the frequency in the middle (equilibrium).

Resonance is a phenomenon where a system amplifies waves whose frequency matches one of its own natural frequencies of vibration.

Human Body is an open vibrational system that cannot avoid to resonate with the rest.

Human energy field measured by Biowell technology

What does GO GREEN mean for me?

- *GREEN* is whatever aspect relates to the Planet Earth. Ancient Wisdom teaches that **each creature is Connected to his/her Environment** by subtle and invisible relations. **My artistic path has the mission to REVEAL this** hidden connection between people and Mother Earth.
- I deeply investigated these relations and discovered that we are strongly ruled by invisible *liaisons* (links) made of energy and frequencies.
- Quantum Physics is nowadays beginning to demonstrate through recognized sciences that **energy is everywhere, and everything is made of interwoven connected energy.**

inspired output after
harmonic sound session

Normal day output

Proofs of this theory are simply made evident in my artworks:

- the aesthetic is influenced by the state of the quality of frequencies that my energetic Body has: the higher and harmonic*, the more Beautiful and **intricately logarithmic** is the output.
- **Different conditions = different results**, related to the place, the food, the thoughts and the people, in the moment I am carving.

What is Inside of Us, is Around Us.

() Harmony to be intended from the mathematical point of view.
From the greek harmonia: "joint, agreement, concord".*

Green is the frequency of Equilibrium.

This is mathematical Harmony.

You are (p)Art of Everything Around **You.**

Art is a way to be in touch with our deeply hidden Self and manifests it as Joy, Love, Beauty and more. This is also a **political statement: Art is (p)art of Us** as an everyday Practice for re-Connecting us to our deepest feeling of **being (p)Art of a Whole**.

TO RESUME...

GREEN is the frequency of the Heart (*Anahata Chakra*).

GREEN is the main color in Nature... This is not fortuity, but **co-incidence**:

/ˈm.sɪ.dəns/ : an event, or the rate at which something happens (from dictionary)

To *co-incide* means that two realities share the same pattern at the same time.

When two conditions get into relation this determines a third one (*result*) to happen, as a consequence.

You are (p)Art of Everything Around You.

Once I understood this, I couldn't ignore it anymore.

«PAPER?! I thought it was porcelain...»

«PORCELAIN !? Wow! Looks like paper!»

Paper or Porcelain? Surprise.

- I found in Porcelain many more potentialities than Paper, so I thought to start from a new industrial product and investigate how to use it for an artistic purpose.
- During exhibitions I enjoy this curious parallel between Paper and Porcelain, such as to amaze people with Surprise that one looks like the other.

On the left: Porcelain Eggshell series – The thinnest carved porcelain ever. A research about fragility.

Art of Awareness.

EGGSHELL series is carved porcelain in sheets of less than 1 mm. It has the intent to present **Beauty through Fragility**.

It highlights the preciousness of something by **linking *fragility* to *unicity* and *unrepeatability***, to help us becoming aware of the importance of taking **care** and **preservation**.

Exactly as for an eco-system, which is the “personal well-being” of Mother Earth.

To Surprise people is my innate ability.

- A very important **gift** that I finally comprehended:
to bring value to the entire Community instead than to my person itself.

Amaze helps to re-consider our own well-known limits.

It helps the entire group of co-relations to slowly **move into a higher level of capabilities**, helping those afterwards to go further and further.

- It's more than simply a matter of **avant-garde** as an "artistic technique"...
It's what kind of Human Being you want to Be and/or Represent.

Promotion.

20 years of experience
in Visual Communication
and Digital Design

To share my research and
results of personal/creative
evolution

To keep people updated
appointments and engage
them to follow me through
fairs and exhibitions:
